

Dear Hiring Manager,

I am writing to express my interest in an entry-level position in Data Analytics or Software Development at your organization. I am currently pursuing a Bachelor of Technology in Artificial Intelligence and Data Science at Saveetha University, Chennai, with a CGPA of 8.96, and I am eager to apply my skills in a practical and impactful environment.

Through my recent internship as a Data Analyst Intern at OneYes Info Tech, I gained hands-on experience in data cleaning, preprocessing, and visualization using Python (Pandas) and Power BI. I also worked extensively with SQL to extract and analyze data, enabling stakeholders to make informed business decisions. Prior to that, I completed a Full Stack Developer Internship at Vulture Lines Tech Management Pvt Ltd, where I contributed to developing an Online Examination System and improved database performance through collaborative debugging.

In addition to my internships, I have worked on projects such as a Sign Language Translation Model, where I implemented deep learning techniques and achieved over 85% accuracy. These experiences have strengthened my problem-solving skills and my ability to work effectively in team environments.

I am also certified in Oracle Cloud Infrastructure, SQL, and Cisco Networking, which has provided me with a solid foundation in cloud technologies and data management. Beyond technical skills, I have demonstrated leadership by managing large-scale events and coordinating teams, which has enhanced my communication and organizational abilities.

I am highly motivated, quick to learn, and passionate about leveraging data and technology to solve real-world problems. I would welcome the opportunity to contribute to your team and grow professionally within your organization.

Thank you for considering my application. I look forward to the possibility of discussing my application further.

Sincerely,

Amirdha Amalraj
